

Kirill Kozlov

Machine Learning Developer / LLM Engineer

Moscow, Russia | Phone: +7 (910) 968 1153 | Email: kirillkozlov.yar@gmail.com

GitHub: github.com/noobmaster-ru | Telegram: @noobmaster_rus

Professional Summary

Python and Machine Learning developer, graduate of the Faculty of Computational Mathematics and Cybernetics at Lomonosov Moscow State University. Build LLM (Large Language Model) agents and RAG (Retrieval-Augmented Generation) systems at X5 Tech: agent design on top of large language models, retrieval over document corpora, OCR (Optical Character Recognition), production deployment. Delivered solutions with a measured business impact of 8 and 10 FTE.

Technical Skills

Programming Languages: Python, SQL, Go, C++

Artificial Intelligence and Machine Learning: Large Language Models (LLM), LLM agents, RAG (Retrieval-Augmented Generation), OpenAI API, LangChain, prompt engineering, OCR (Optical Character Recognition), PyTorch, Claude Code

Frameworks: FastAPI, SQLAlchemy (async), Alembic, Pydantic, aiogram, pytest

Libraries: asyncio, httpx, aiohttp, requests, pandas, NumPy, scikit-learn, structlog

Databases: PostgreSQL, Redis

Infrastructure and DevOps: Docker, Kubernetes (K8s), Helm, GitLab CI/CD, Apache Kafka, Nginx, Git, Linux

Languages: Russian — Native, English — Intermediate (B1)

Work Experience

Machine Learning Developer | X5 Tech (X5 Group, Russia's largest grocery retailer), AI Agents Department, Moscow | April 2026 — Present

- Built an LLM agent for legal document analysis; delivered a business impact of 8 FTE for X5 Group.
- Built a retrieval pipeline over the corpus of Russian legislation: document chunking, search index, injection of relevant context into the prompt (RAG).
- Developed the FastAPI backend for an OCR service recognizing utility bills across X5 Group premises, working with a team of ML engineers; business impact of 10 FTE.
- Automating analysis of foreign invoices and bills for the X5 Import business unit using OCR and Large Language Models.
- Deployed the solution to a Kubernetes cluster in dev and prod environments via Helm and GitLab CI/CD.

Projects

Python Developer, AxiomAI | github.com/noobmaster-ru/axiomai, Moscow | October 2025 — April 2026

- Built and deployed an aiogram Telegram bot using the OpenAI API, PostgreSQL, Redis, and Docker.
- Reduced manager workload by 80% and improved response speed in business communications.

Python Developer, WB Parser (Telegram Mini App) | Moscow | July 2025 — September 2025

- Developed a Wildberries search-results parser with filtering by organic product position.
- Delivered the product as a Telegram Mini App with a backend and database; reached 220 active users.

Python Developer, Placa | Moscow | July 2024 — December 2024

- Built a Google Sheets analytics service for Wildberries sellers using Google Apps Script and the Wildberries API.
- Automated daily data loading: copy the spreadsheet template, enter an API token, run jobs from a control panel.
- Enabled approximately 300 sellers to receive daily advertising spend data.

Education

Lomonosov Moscow State University | Faculty of Computational Mathematics and Cybernetics, Moscow | August 2022 — August 2026

- Deep Learning School (DLS), Computer Vision and NLP tracks — MIPT School of Deep Learning.
- Summer School on A/B Testing, X5 Tech.

Interests

Volleyball, artificial intelligence, gym, economics, history.
