Phone: +7 (910) 968 1153 | Email: kirillkozlov.yar@gmail.com | GitHub: github.com/noobmaster-ru

Professional Summary

Engineer who turns business processes into deployed AI systems. At X5 Tech I took three business problems from problem framing to production for internal customers: an LLM contract-review agent for the legal department (over 500 production reviews, a legal opinion in 8–19 minutes instead of about 97, 8 FTE saved), an OCR pipeline for utility bills (10 FTE saved) and an OCR and LLM invoice service for the import business unit (first commit to a production pilot in under three months). Own the full lifecycle: FastAPI services, LangChain pipelines, open-source and commercial LLMs inside a closed corporate perimeter, Kubernetes, GitLab CI/CD, post-deployment monitoring. Master's student in Machine Learning at CMC MSU. English B1.

Technical Skills

Delivery: end-to-end ownership from problem framing to production, rapid prototyping, deployment in private and on-premise environments, Docker, Kubernetes (K8s), Helm, GitLab CI/CD, Grafana, Git, Linux

AI and LLM: Large Language Models (LLM), LLM agents, prompt engineering, RAG (Retrieval-Augmented Generation), BM25, LangChain, OpenAI API, Ollama (Llama 3.2, Qwen 2.5, Qwen3-VL), OCR (Optical Character Recognition), key entity extraction from business documents, A/B testing, Claude Code

Backend: Python, SQL, Go, C++; FastAPI, SQLAlchemy (async), Alembic, Pydantic, pytest, asyncio, httpx, aiohttp

Data: PostgreSQL, Redis, Apache Kafka

Languages: Russian — Native, English — B1

Work Experience

Machine Learning Developer | X5 Tech (X5 Group, Russia's largest grocery retailer), AI Agents Department, Moscow | April 2026 — Present

- Delivered a production LLM agent for the legal department's contract review: a multi-agent pipeline on LangChain (document processing, requisite extraction, counterparty and property checks, risk analysis, legal opinion) with contract sections analyzed in parallel. Over 500 reviews in production in May–August 2026; a legal opinion in 8–19 minutes instead of about 97 minutes of manual lawyer work; 8 FTE saved.
- Deployed the solution inside the corporate perimeter: open-source models (Llama 3.2, Qwen 2.5, Qwen3-VL for scanned documents) served via Ollama alongside OpenAI GPT-4o-mini; Kubernetes dev and prod via Helm charts and GitLab CI/CD; latency monitoring in Grafana.
- Built a RAG data source over Russian legislation (40 federal laws, 366 articles including the Civil Code, BM25 index) with relevant articles injected into agent prompts.
- Implemented OCR and LLM extraction of key entities from contracts, property registry extracts and powers of attorney, with validation of extracted attributes for consistency across documents.
- Shipped an OCR and LLM service that reads foreign invoices for the X5 Import business unit: from first commit in June 2026 to dev and prod deployment and a pilot with the internal consumer platform in August 2026.
- Developed the FastAPI backend for utility-bill processing across X5 Group premises: OCR results consumed from Apache Kafka, stored and served to the frontend; 10 FTE saved.

Projects (shipped to real users)

AxiomAI (LLM-powered Telegram bot) | github.com/noobmaster-ru/axiomai | October 2025 — April 2026

- Built and deployed an aiogram bot on the OpenAI API with PostgreSQL, Redis and Docker for a business's customer communications; reduced manager workload by 80%.

WB Parser | github.com/noobmaster-ru/tg-mini-app-backend | July 2025 — September 2025

- Wildberries search-results parser delivered as a Telegram Mini App with backend and database; 220 active users.

Placa | github.com/noobmaster-ru/wb_tables | July 2024 — December 2024

- Self-service Google Sheets analytics for Wildberries sellers (Google Apps Script, Wildberries API, daily automated loads); about 300 sellers.

Education

Lomonosov Moscow State University, Master's degree | Faculty of Computational Mathematics and Cybernetics (CMC), Dept. of Mathematical Methods of Forecasting, Machine Learning | September 2026 — Present

Lomonosov Moscow State University, Bachelor's degree | Faculty of Computational Mathematics and Cybernetics (CMC) | August 2022 — August 2026

- Summer School on A/B Testing, X5 Tech — Summer 2026.
- Deep Learning School (DLS), Computer Vision and NLP tracks — MIPT School of Deep Learning.
