Professional Summary

Software engineer and Machine Learning master's student at CMC MSU with production experience at X5 Tech. Built Python services using FastAPI, PostgreSQL, and Kubernetes; developing AI product search and catalog-processing pipelines for Korzina.

Technical Skills

Delivery: end-to-end ownership from problem framing to production, rapid prototyping, deployment in private and on-premise environments, Docker, Kubernetes (K8s), Helm, GitLab CI/CD, Grafana, Git, Linux
AI and LLM: Large Language Models (LLM), LLM agents, prompt engineering, RAG (Retrieval-Augmented Generation), BM25, LangChain, OpenAI API, Ollama (Llama 3.2, Qwen 2.5, Qwen3-VL), OCR, key entity extraction from business documents, A/B testing, Claude Code
Backend: Python, SQL, Go, C++; FastAPI, SQLAlchemy (async), Alembic, Pydantic, pytest, asyncio, httpx, aiohttp
Data: PostgreSQL, Redis, Apache Kafka
Languages: Russian — Native, English — B2

Work Experience

Python Developer (Junior) | X5 Tech (X5 Group, Russia's largest grocery retailer), Logistics Solutions Department, Moscow | October 2026 — Present

- Developing the system that handles 90% of all foreign supplies X5 Retail Group purchases for its retail chains.

Machine Learning Developer (Intern) | X5 Tech, AI Agents Department, Moscow | April 2026 — October 2026

- Delivered a production LLM agent for the legal department's contract review: a multi-agent pipeline on LangChain (document processing, requisite extraction, counterparty and property checks, risk analysis, legal opinion) with contract sections analyzed in parallel. Over 500 reviews in production in May–August 2026; a legal opinion in 8–19 minutes instead of about 97 minutes of manual lawyer work; 8 FTE saved.
- Deployed the solution inside the corporate perimeter: open-source models (Llama 3.2, Qwen 2.5, Qwen3-VL for scanned documents) served via Ollama alongside OpenAI GPT-4o-mini; Kubernetes dev and prod via Helm charts and GitLab CI/CD; latency monitoring in Grafana.
- Built a RAG data source over Russian legislation (40 federal laws, 366 articles including the Civil Code, BM25 index) with relevant articles injected into agent prompts.
- Implemented OCR and LLM extraction of key entities from contracts, property registry extracts and powers of attorney, with validation of extracted attributes for consistency across documents.
- Shipped an OCR and LLM service that reads foreign invoices for X5 Tech: from first commit in June 2026 to dev and prod deployment and a pilot with the internal consumer platform in August 2026.
- Developed the FastAPI backend for utility-bill processing across X5 Group premises: OCR results consumed from Apache Kafka, stored and served to the frontend; 10 FTE saved.

Projects

Korzina — Marketplace and AI Product Search | TypeScript, Node.js, PostgreSQL, React | September 2026 — Present

- Building a Telegram Mini App and bot with a catalog of 100,000+ products; automated supplier-data ingestion, normalization, and deduplication.
- Implemented PostgreSQL full-text and trigram search; developing a hybrid retrieval prototype combining multimodal Gemini embeddings, pgvector, reciprocal rank fusion (RRF), and Qwen reranking.
- Implemented LLM/VLM attribute extraction and product-compatibility checks in the prototype, with versioned embedding caches, concurrent-request deduplication, and incremental refresh.
- Built offline relevance evaluation with frozen datasets, qrels, Recall@20, and Precision@5; compared text and multimodal retrieval under model-cost and latency constraints.
- Built the Fastify API and background jobs; deployed the service using PostgreSQL, Valkey, S3, Docker, and GitLab CI/CD.

Other projects: AxiomAI: LLM-powered Telegram bot, 80% reduction in manager workload; WB Parser: Wildberries parser and Mini App, 220 users; Placa: analytics for 300 sellers.

Education

Lomonosov Moscow State University, Master's degree | Faculty of Computational Mathematics and Cybernetics (CMC), Dept. of Mathematical Methods of Forecasting, Machine Learning | September 2026 — Present

Lomonosov Moscow State University, Bachelor's degree | Faculty of Computational Mathematics and Cybernetics (CMC) | August 2022 — August 2026

- Summer School on A/B Testing, X5 Tech — Summer 2026 (certificate no. 9074503).
- Deep Learning School (DLS), Computer Vision and NLP tracks — MIPT School of Deep Learning.
