

Kirill Kozlov

Mid-level Machine Learning Developer (Python, LLM, RAG)

Moscow, Russia | Phone: +7 (910) 968 1153 | Email: kirillkozlov.yar@gmail.com

GitHub: github.com/noobmaster-ru | LinkedIn: linkedin.com/in/kirillkozlov | Telegram: [@noobmaster_rus](https://t.me/noobmaster_rus)

Professional Summary

Machine Learning developer with a Bachelor's degree from the Faculty of Computational Mathematics and Cybernetics (CMC) at Lomonosov Moscow State University, currently a Master's student in Machine Learning at the same faculty. At X5 Tech built an LLM agent for contract review: over 500 production reviews in four months, a legal opinion in 8–19 minutes instead of about 97 minutes of manual lawyer work, business impact of 8 FTE. Core skills: Python, LLM and RAG (LangChain, BM25), FastAPI, PostgreSQL, Kubernetes.

Technical Skills

Programming Languages: Python, SQL, Go, C++

Artificial Intelligence and Machine Learning: Large Language Models (LLM), LLM agents, RAG (Retrieval-Augmented Generation), BM25, OpenAI API, LangChain, prompt engineering, OCR (Optical Character Recognition), A/B testing, PyTorch, Claude Code

Frameworks: FastAPI, SQLAlchemy (async), Alembic, Pydantic, aiogram, pytest

Libraries: asyncio, httpx, aiohttp, requests, pandas, NumPy, scikit-learn, structlog

Databases and Messaging: PostgreSQL, Redis, Apache Kafka

Infrastructure and DevOps: Docker, Kubernetes (K8s), Helm, GitLab CI/CD, Nginx, Git, Linux

Languages: Russian — Native, English — Upper-Intermediate (B2)

Work Experience

Machine Learning Developer | X5 Tech (X5 Group, Russia's largest grocery retailer), AI Agents Department, Moscow | April 2026 — Present

- Built an LLM agent on LangChain for contract review: over 500 production reviews in May–August 2026, a legal opinion in 8–19 minutes instead of about 97 minutes of manual lawyer work; business impact of 8 FTE for X5 Group.
- Implemented retrieval over a legislation corpus for RAG: 40 federal laws, 366 articles (including the Civil Code), BM25 index, injection of relevant articles into the agent prompt.
- Developed the FastAPI backend for a utility-bill processing service: consuming OCR results from Apache Kafka, storing them and serving them to the frontend; business impact of 10 FTE.
- Built and deployed to dev and prod a foreign invoice analysis service based on OCR and LLM for the X5 Import business unit; in pilot operation since August 2026.
- Deployed the services to a Kubernetes cluster (dev and prod) via Helm and GitLab CI/CD; agent latency is tracked in Grafana.

Projects

Python Developer, AxiomAI | github.com/noobmaster-ru/axiomai | October 2025 — April 2026

- Built and deployed an aiogram Telegram bot using the OpenAI API, PostgreSQL, Redis, and Docker.
- Reduced manager workload by 80% and improved response speed in business communications.

Python Developer, WB Parser (Telegram Mini App) | github.com/noobmaster-ru/tg-mini-app-backend | July 2025 — September 2025

- Developed a Wildberries search-results parser with filtering by organic product position.
- Delivered the product as a Telegram Mini App with a backend and database; reached 220 active users.

Python Developer, Placa | github.com/noobmaster-ru/wb_tables | July 2024 — December 2024

- Built a Google Sheets analytics service for Wildberries sellers using Google Apps Script and the Wildberries API.
- Automated daily data loading: copy the spreadsheet template, enter an API token, run jobs from a control panel.
- Enabled approximately 300 sellers to receive daily advertising spend data.

Education

Lomonosov Moscow State University, Master's degree | Faculty of Computational Mathematics and Cybernetics, Department of Mathematical Methods of Forecasting, major in Machine Learning, Moscow | September 2026 — Present

Lomonosov Moscow State University, Bachelor's degree | Faculty of Computational Mathematics and Cybernetics, Moscow | August 2022 — August 2026

- Deep Learning School (DLS), Computer Vision and NLP tracks — MIPT School of Deep Learning.
- Summer School on A/B Testing, X5 Tech — Summer 2026.
